EDUCATION

Indian Institute of Information Technology Sri City

2024 - 2028

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.94
(Till 3rd Semester)

SKILLS

Languages	JavaScript, TypeScript, SQL, C
Frontend	HTML, CSS, React, Tailwind CSS
Backend	Node.js, Express.js, NestJS
Database	MongoDB, MySQL
Core CS	Data Structures and Algorithms, OOPs, Operating Systems, Computer Networks, Theory of Computation
Tools	Git, GitHub, VS Code, Vercel

PROJECTS

Ware2Door – Logistics Management System

Tech Stack: NestJS, TypeScript, React, MongoDB

- Developing a logistics management platform to manage shipment flow from warehouse to customer delivery.
- Designed workflow involving warehouses, transit hubs, local delivery agencies, and delivery personnel.
- Building scalable backend services using **NestJS** and **TypeScript** with modular backend architecture.
- Developing shipment tracking and status management features for efficient logistics management.

Job Portal Website

Tech Stack: MongoDB, Express.js, React, Node.js, Tailwind CSS

- Building a full stack MERN job portal platform for job seekers and recruiters.
- Implementing authentication, job postings, profile management, and application tracking.
- Developing responsive frontend UI using **React** and **Tailwind CSS**.
- Using **Node.js**, **Express.js**, and **MongoDB** for backend services and database management.

HACKATHONS & ACTIVITIES

- Participated in **Hack The Threat**, a cybersecurity-focused hackathon involving security awareness and technical problem solving.
- Participated in **Ideaverse Hackathon**, collaborating on innovative software solution ideas and development workflows.

AREAS OF INTEREST

- Full Stack Development
- Data Structures and Algorithms
- Scalable Software Systems
- Backend Architecture and System Design
- Problem Solving and Competitive Programming
